New product: BBQ cutlery with the possibility of individualisation

Robbe & Berking heralds a new BBQ era with customisable steak knives and carving sets

Since 2018, Robbe & Berking has been offering extra-sharp steak cutlery and a carving set. Since this spring, it is now also possible to make the steak cutlery truly "unique" with the latest laser technology.

What until now only engravers were able to do on the silver handles, will in future also be possible on the steak knife blades and on the blades of carving knives. Whether initials, coats of arms, texts or silhouettes of houses, yachts or landscapes - the silversmiths draw everything on customer request in detail and sharply on the blade with lasers.

The top class steak cutlery, transports style and table culture to the barbecue area. Diamond Like Carbon (DLC) is the recipe of the manufactory from Flensburg. An anthracite-black coating from the material class of diamond-like carbons, which combines outstanding mechanical properties with a very noble technical look in "Frozen Black".

A must-have for every barbecue enthusiast so that the coming barbecue season will be perfect.

Robbe & Berking World:

Silver is a metal whose beauty has fascinated people for thousands of years. Throughout all cultural epochs, this highly lustrous metal has inspired artists to create something everlasting. Today, the pieces of the **silver manufactory Robbe & Berking** (www.robbeberking.com) are considered by connoisseurs all over the world as unsurpassed masterpieces of silversmithing and are a synonym for highest quality made in Germany. The silver manufacturer Robbe & Berking is a family business founded in 1874, now run by the fifth generation. To this day, it is the silversmith's hand alone that determines the quality of each piece and not the limited possibilities of rational mass production. This has made the manufactory the largest producer of silver cutlery in the world. The collection consists of over 4,000 silver and silver-plated pieces, which are used to furnish restaurants, hotels, residences and embassies, cruise ships, aircrafts, private yachts and much more all over the world, in addition to private households. In more than half of the world's 200 largest private yachts, silver from Flensburg can be found on the tables.

In 2008, the shipyard **Robbe & Berking Classics** (www.classic-yachts.com) was founded, which today includes a yacht broker, its own **Robbe & Berking Museum** and the world's largest yachting library with almost 10,000 antiquarian books and magazines. Since its foundation, more than 10,000 lovers of classic yachts have been welcomed at Robbe & Berking Classics. The shipyard already rescued several famous racing yachts in the metre classes and either restored or rebuilt them. Researching lost yachts and their original construction plans is one of the important tasks. At the same time, the shipyard also builds newly designed yachts – cruisers, racing yachts, motor boats, tenders and dinghies.
